

About Arkansas Health Network

Arkansas Health Network (AHN) is the largest physician-led clinically integrated network in Arkansas. Established by CHI St. Vincent in 2013, AHN is part of a community of healers and leaders across Arkansas committed to driving meaningful, measurable improvement in quality, health, and financial sustainability for patients and providers through excellence in value-based care. AHN has proven itself to be the most successful and innovative CIN in the state, saving over \$50M in medical spending since our inception.

The Clinically Integrated Network (CIN) Difference

Three Major Pillars of AHN Model

High Value & Robust Provider Network

Advanced Care Management

Proactive Data & Analytics

Direct-to-Employer Services

Employers are facing year-over-year cost increases to their health plan due to rising premiums and a health system focused on treating the sick instead of keeping people well. To address this need, AHN began an innovative collaboration with Arkansas Children's Care Network (ACCN) and NextHealth (NH), to form AR NetPartners.

AR NetPartners brings a nationally recognized best practice in population health and value-based care to Arkansas employers, employees and their families by providing a better healthcare experience, better value and better health through proactive engagement. We provide value to our clients by employing a team of multidisciplinary clinicians utilizing data and analytics to help patients and providers navigate an increasingly complex health system.

AR NetPartners will work with you to:

- Lower your PMPM costs.
- Work with any existing TPA and plan.
- Utilize analytics to leverage claims and clinical data.
- Reduce sick days.
- Serve the entire family – adults and pediatrics (employees and their dependents).
- Cover the entire state of Arkansas, giving our members more options for providers and specialists near them.
- Customize our approach to meet employers' needs.
- Gain access to exclusive network of providers with the state's only Magnet Hospitals.
- Bend the cost curve for employers through a happier, healthier, and more productive workforce.
