

## CPT II Codes for Blood Pressure Management

### Importance of CPT II Coding

Current Procedural Terminology (CPT) Category II codes were developed as a **supplemental performance tracking set of procedural codes** in addition to the Category I and III coding sets. They help identify information about the quality of care delivered by coding a number of services or test results that support quality measures. **Category II codes are optional, and cannot be used to replace Category I codes for billing purposes.**

All measures are to be submitted a minimum of **once per performance period** for patients seen during the period. **For auditing purposes, the last reading/result of the measurement year will be used for HEDIS reporting and performance rating for Diabetic HbA1c Control and Controlling Blood Pressure metrics.**

While they are for reporting use only, CPT II coding is strongly encouraged in order to decrease the need for provider data submission, record abstraction and chart review -- and faster payments!

### Commonly Used CPT II Codes for Controlling Blood Pressure

Measure	CPT II Code	Description
Controlling Blood Pressure <i>*Must be submitted on a claim with ICD-10 Diagnosis for Essential Hypertension I10</i>	3074F	Most recent systolic blood pressure < 130 mmHg
	3075F	Most recent systolic blood pressure 130-139 mmHg
	3077F	Most recent systolic blood pressure >=140 mmHg
	3078F	Most recent diastolic blood pressure < 80 mmHg
	3079F	Most recent diastolic blood pressure 80-89 mmHg
	3080F	Most recent diastolic blood pressure >=90 mmHg
