

## About Arkansas Health Network

Arkansas Health Network (AHN) is the largest physician-led clinically integrated network in Arkansas. Established in 2013, AHN is committed to driving measurable improvement in quality, health, and financial sustainability for patients and providers through value-based care. AHN has proven itself to be successful and innovative, with \$63M+ in total savings across all contracts since 2014.

## URAC Accredited

In March 2023, AHN became the first Clinically Integrated Network (CIN) in the industry to attain **dual accreditation** in Clinical Integration and Employer Based Population Health. This unique accomplishment directly aligns with our mission to build healthy communities in Arkansas through value-based care.

## The Clinically Integrated Network (CIN) Difference

Typical Healthcare Experience	Clinically Integrated Network
Treating illness	Preventing illness
Fragmented care	Coordinated care
'Do-It-Yourself' care	RN Health Coaches
Payor-led	Physician-led

## Three Major Pillars of AHN Model

High Value & Robust Provider Network

Advanced Care Management

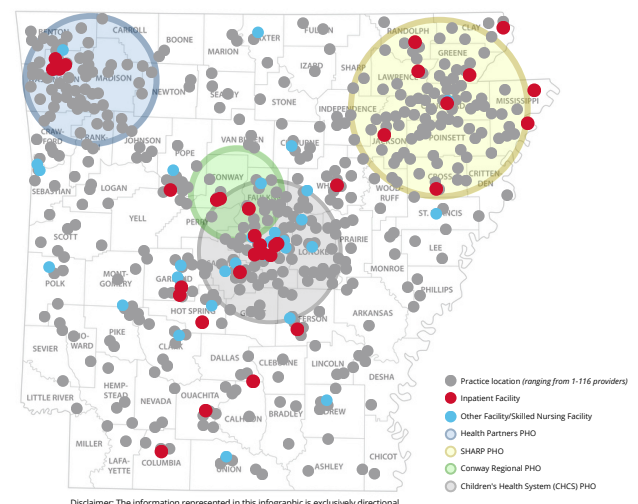

Proactive Data & Analytics

## AR NetPartners Network Profile (as of Jan 2025):

- **4800+** Providers
- **23%** Primary care providers (1000+ PCPs in network)
- **91%** Independent providers
- **840+** Practice Locations
- **31** Hospitals (Includes 3 of 4 Magnet designated hospitals in the state)
- **25** Skilled nursing facilities
- **98** Pediatric groups

## AHN Value and Quality:

- **\$63 Million+** total savings since 2014 (for all VBA contracts)
- **\$3.25M** in shared savings from Humana MA 2022
- **140K+** total lives managed YTD in 2025

## Employer-Based Population Health Services

Employers are facing year-over-year cost increases to their health plan due to rising premiums and a health system focused on treating the sick instead of keeping people well. To address this need, AHN began an innovative collaboration with Arkansas Children's Care Network (ACCN) and NextHealth (NH), to form AR NetPartners.

AR NetPartners brings a nationally recognized best practice in population health and value-based care to Arkansas employers, employees and their families by providing a better healthcare experience, better value and better health through proactive engagement. We provide value to our clients by employing a team of multidisciplinary clinicians utilizing data and analytics to help patients and providers navigate an increasingly complex health system.

## AR NetPartners will work to:

- Lower per-member-per-month (PMPM) costs
- Collaborate with any existing Third-Party Administrator (TPA) and plan
- Leverage claims and clinical data to identify high and rising risk individuals
- Reduce sick days
- Serve adults and pediatrics (employees and their dependents)
- Cover the entire state of Arkansas, giving our members more options for providers and specialists near them
- Customize our approach to meet employers' needs
- Gain access to our exclusive network with the state's only Magnet Hospitals
- Bend the cost curve through a happier, healthier, and more productive workforce
